product type designation product description

IE Connecting Cable M12-180/M12-180

Flexible plug-in cable (4-wire), preferred length, prefabricated with two 4-pole M12 connectors (D-coded, 180° cable outlet)

Industrial Ethernet connecting Cable M12-180/M12-180, pre-assembled IE FC Trailing cable GP, with 2 M12 plugs (D-coded) length 15.0 m.

suitability for use	For connecting Industrial Ethernet stations (e.g. SIMATIC ET200 and SCALANCE XP-200) in IP 65/67 degree of protection		
cable designation	2YY (ST) CY 2x2x0,75/1,5-100 LI GN		
wire length	15 m		
electrical data			
number of electrical connections	2		
attenuation factor per length			
• at 10 MHz / maximum	0.063 dB/m		
• at 100 MHz / maximum	0.213 dB/m		
impedance			
• at 1 MHz 100 MHz	100 Ω		
relative symmetrical tolerance			
• of the characteristic impedance at 1 MHz 100 MHz	5 %		
near-end crosstalk per length			
• at 1 MHz 100 MHz	0.5 dB/m		
transfer impedance per length / at 10 MHz	20 mΩ/m		
loop resistance per length / maximum	120 mΩ/m		
operating voltage			
RMS value	80 V		
NVP value in percent	66 %		
mechanical data			
number of electrical cores	4		
design of the shield	Overlapped aluminum-clad foil, sheathed in a braided screen of tin-plated copper wires		
core diameter			
 of AWG22 insulated conductor 	0.75 mm		
outer diameter			
of inner conductor	0.75 mm		
 of the wire insulation 	1.5 mm		
 of the inner sheath of the cable 	3.9 mm		
of cable sheath	6.5 mm		
symmetrical tolerance of the outer diameter / of cable sheath	0.2 mm		
material			
 of the wire insulation 	polyethylene (PE)		
 of the inner sheath of the cable 	PVC		
of cable sheath	PVC		
color			
 of the insulation of data wires 	white/yellow/blue/orange		

international	 of cable sheath 	green

	security information	Siemens provides products and solutions with industrial cybersecurity functions		

Subject to change without notice © Copyright Siemens that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
