

## SPECIAL I/O MODULES

### HIGH-DENSITY INPUT MODULE SPECIFICATIONS (GROUP-2)

The High-density Input Modules let you pack more input points into a single I/O slot for greater space savings. These modules do not use standard I/O points. Thus, they increase the overall I/O capacity. They provide 32 or 64 discrete input points. The modules can be used with Omron's Terminal Blocks, reducing wiring between control panels, as well as within control panels.

### Features

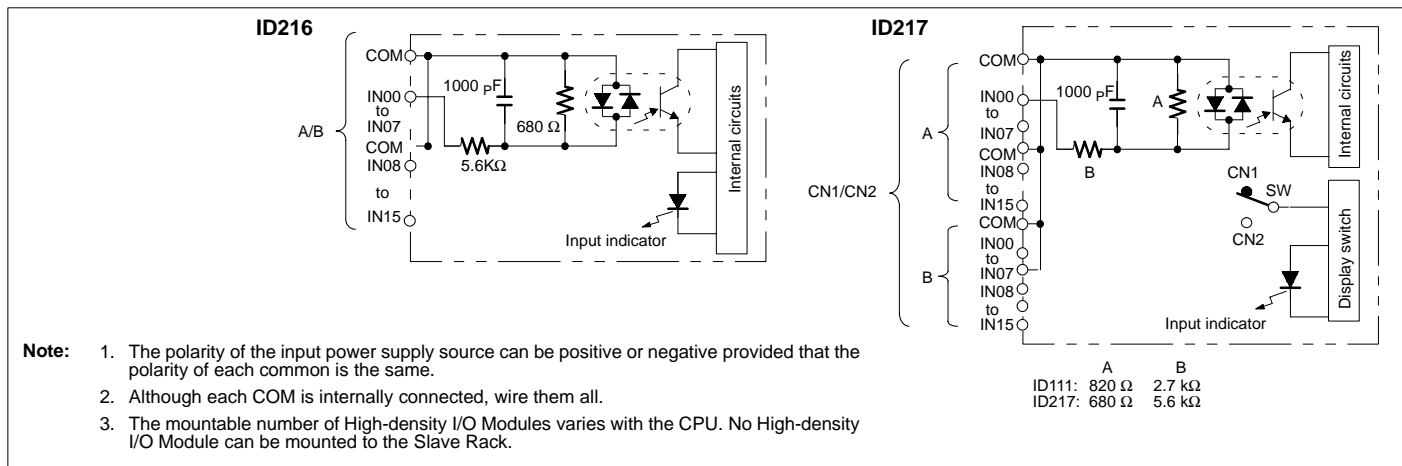

- Easy cable connection to Omron's XW2B-□ Terminal Blocks using XW2Z-□ Connecting Cable. Refer to the *Standard Parts* section for detailed ordering information.
- Up to ten 64-point modules or 32-point modules per PLC

**Note:** The ambient temperature affects the number of points that can be ON simultaneously.
