SIEMENS

Data sheet

6GK7242-7KX31-0XE0

product type designation

CP 1242-7 V2

- - spare part - - communications processor CP 1242-7 V2 for connection of SIMATIC S7-1200 to GSM/GPRS network; web server access to CPU, data point configuration, observe national approvals.

transfer rate		
transfer rate		
 for GPRS transmission 		
— with downlink / maximum	86 kbit/s	
— with uplink / maximum	43 kbit/s	
interfaces		
number of interfaces / according to Industrial Ethernet	0	
number of electrical connections		
for external antenna(s)	1	
for power supply	1	
number of slots		
• for SIM cards	1	
type of electrical connection		
for external antenna(s)	SMA socket (50 ohms)	
• for power supply	3-pole terminal block	
slot version		
• for SIM card	Standard	
wireless technology		
type of mobile wireless service / is supported		
• SMS	Yes	
• GPRS	Yes	
•	GPRS (Multislot Class 10)	
type of wireless network / is supported		
• GSM	Yes	
• UMTS	No	
• LTE	No	
operating frequency		
• 850 MHz	Yes	
• 900 MHz	Yes	
• 1800 MHz	Yes	
• 1900 MHz	Yes	
transmit power		
 at operating frequency 900 MHz 	2 W	
 at operating frequency 1800 MHz 	1 W	
 at operating frequency 1900 MHz 	1 W	
supply voltage, current consumption, power loss		
type of voltage / of the supply voltage	DC	
supply voltage / external	24 V	
supply voltage / external / at DC / rated value	24 V	

relative positive tolerance / at DC / at 24 V	20 %
relative negative tolerance / at DC / at 24 V	20 %
consumed current	
 from external supply voltage / at DC / at 24 V / typical 	0.1 A
• from external supply voltage / at DC / at 24 V / maximum	0.22 A
power loss [W]	2.4 W
ambient conditions	
ambient temperature	
 for vertical installation / during operation 	-20 +60 °C
 for horizontally arranged busbars / during operation 	-20 +70 °C
during storage	-40 +70 °C
during transport	-40 +70 °C
relative humidity	
 at 25 °C / without condensation / during operation / maximum 	95 %
protection class IP	IP20
design, dimensions and weights	
module format	Compact module S7-1200 single width
width	30 mm
height	100 mm
depth	75 mm
net weight	0.133 kg
fastening method	
35 mm top hat DIN rail mounting	Yes
S7-300 rail mounting	No
wall mounting	Yes
product features, product functions, product components / gen	eral
number of units	
• per CPU / maximum	3
performance data	
number of users/telephone numbers / definable / maximum	10
performance data / open communication	
number of possible connections / for open communication	
by means of T blocks / maximum	like CPU
performance data / IT functions	
number of possible connections	
Humber of possible confidentions	
	1
as email client / maximum	1
as email client / maximum performance data / telecontrol	
as email client / maximum performance data / telecontrol control center connection	Telecontrol Server Basic
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection	Telecontrol Server Basic supported
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection	Telecontrol Server Basic supported supported
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note	Telecontrol Server Basic supported
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 lEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 lEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum performance data / teleservice	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 lEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7 product function	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events Yes
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7 product function program download with SIMATIC STEP 7	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events Yes Yes
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7 product function program download with SIMATIC STEP 7 remote firmware update	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events Yes
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7 product function program download with SIMATIC STEP 7 remote firmware update product functions / management, configuration, engineering	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events Yes Yes
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 lEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum performance data / teleservice diagnostics function program download with SIMATIC STEP 7 remote firmware update product functions / management, configuration, engineering configuration software	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events Yes Yes Yes
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7 product function program download with SIMATIC STEP 7 remote firmware update product functions / management, configuration, engineering configuration software required	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events Yes Yes
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7 product function program download with SIMATIC STEP 7 remote firmware update product functions / management, configuration, engineering configuration software required product functions / diagnostics	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events Yes Yes Yes Yes Yes
as email client / maximum performance data / telecontrol control center connection by means of a permanent connection by means of demand-oriented connection note protocol / is supported DNP3 IEC 60870-5 product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic in send direction / maximum in receive direction / maximum performance data / teleservice diagnostics function / online diagnostics with SIMATIC STEP 7 product function program download with SIMATIC STEP 7 remote firmware update product functions / management, configuration, engineering configuration software required	Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface No No Yes; 64,000 events Yes Yes Yes

product function	
 password protection for teleservice access 	Yes
 encrypted data transmission 	Yes
product functions / time	
protocol / is supported	
• NTP	Yes
time synchronization	
from control center	Yes

security information	
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)

Approvals / Certificates

General Product Approval

For use in hazardous locations

For use in hazardous locations

Radio Equipment Type Approval Certificate
